Gymnastics One-on-One for Special Needs Kids

One-on-one instruction

At Funtastic Gymnastic our licensed therapists (Occupational, Physical, Speech etc.) work one-on-one with your child using gymnastics as a means to enhance the therapeutic experience.

This program is insurance eligible.

Your child will be having so much fun that he won't realize this is therapy. Our classes are 30 & 45 minutes in length depending on the skill level of your child. The goal is to graduate each child into the small group sessions.

Small group instruction

Our licensed therapists, (Occupational, Physical, Speech, etc.) with the aid of one or more assistants, use the same gymnastic exercises as in our one-on-one program with the added benefit of teaching socialization skills. We attempt to keep the ratio of staff to children as close to one-on-one as possible.

This program is insurance eligible.

Our classes are 30 & 45 minutes in length depending on the children. These sessions are the stepping stones to the Special Olympics.

Gymnastics One-on-One for Special Needs Kids

Our Mission

To be a bridge for your child to acquire the skills to participate in group gymnastics. Our licensed and trained occupational and physical therapists aim to build a close relationship with your child while allowing him/her to participate in life enriching activities.

Insurance eligible programs

Our gymnastics program helps your child develop:

- Self confidence
- Self awareness
- Physical development
- Social integration

Our trained therapists focus on developing upper and lower body strength, coordination, spatial awareness, balance and following directions.

We use:

- Balance beams
- Trampolines
- Springboards
- Tumbling exercises
- Pommel horse
- Swings

Locations:

Throughout Wisconsin and Illinois
